TRAINING

The focus of this plan is to improve **strength**, mobility, functionality, and flexibility. Every session will include a 15min. warm-up, followed by a 10min. stretching routine. Stretching is imperative to improving your functionality and providing your muscles with the recovery they need to grow, TAKE YOUR STRETCHING SERIOUSLY. During your lifts you must be focused on chasing the discomfort that comes with growing new muscle. You should never hurt from your training, but your muscles should be SEVERELY fatigued. If you can't push yourself past exhaustion, your muscles will not learn to adapt to the new stress being applied to them, thus your "gains" will be slower and smaller (we don't want that). In all of your exercises focus on feeling the STRETCH/ACTIVATION/SQUEEZE.
