Activity Keypoints

- plan – build up a routine that is pointed towards longer term and establishment of habit
 - You can do extra if desired, no problem (e.g. 6 days per week)
 - Typical high-endurance routine is 4-5 days/wk
- target - 300 minutes over 4 days/wk
 - 120 min training / motion (e.g. lifts)
 - 130 min exercise / cardio & fitness (e.g. running)
 - 130 min recreation activity (e.g. walk the lake)
- The average healthy weight loss pace is 1 lbs/month
 - Your plan calls for at least one year
- Gain muscle first, don't emphasize weight loss until after
 - "Convert your weight, it's not a Lose/Grow game you see"*
 - This minimizes number of cycles and time taken dramatically
 - There will be several rounds to final achieved goals
- Diet and diet-balance are one of the most important long term components of your plan.
 - Especially in Protein/Carb/Fat distribution. Healthy Fats are a strong replacement for Carbs
 - A primary goal is healthy lifestyle balance, ensure you target something that you can maintain

Note:

Consider supplementing your diet with a Probiotic and an Amino Acid
